To Our Valued Customer,

REACH, Registration, Evaluation, Authorization and restriction of Chemicals, is based on the idea that industry itself is best placed to ensure that the chemicals it manufactures and puts on the market in the European Union do not adversely affect human health or the environment. The ECHA, European Chemicals Agency, requires manufacturers of chemicals to obtain relevant information on their substances used in their end product and register that data.

As a steel service center, Precision Steel Warehouse, Inc. is solely a processor and distributor of metals not a manufacturer. We have contacted our entire vendor base as to their intentions for support in the REACH Directive. As they respond we will post them on our web site www.precisionsteel.com

If you have any questions please contact us.

Sincerely,

Stephen Kraft
Marketing Manager
