

PRECISION STEEL

Can Save Your Company MONEY!

Precision Stak Pak™—a group of slit, uniform, tight ribbon wound coils, and only held together by two-sided tape on the inside and outside wraps of each coil. Guaranteed not to fall apart resulting in less chance of damage in transit and quicker delivery.**

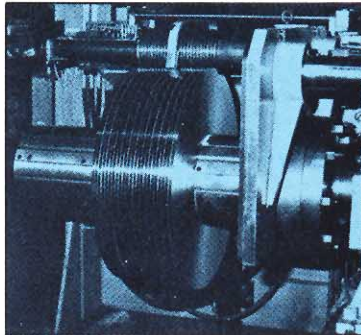

STAK PAK

T.M.

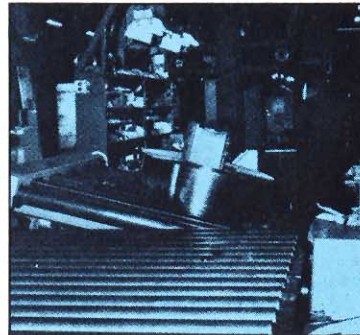

ELIMINATES BANDS FROM COILS

22 cuts of slit material going through over-arm dividers prior winding on Mandrel. Saves you time and time is money.

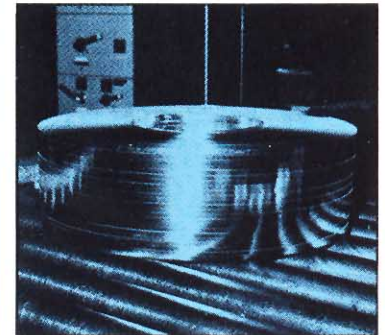

TIGHT UNIFORM COILS

Wound on slitter Mandrel. Results in more consistency in large coils.

NO PAPER IN COILS

Precision Pak being removed from slitting Mandrel as one solid group of coils.

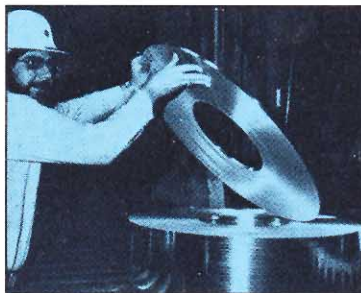

NO DAMAGED EDGES

Precision Stak Pak™ before banding. Only two-sided tape on the inside and outside wraps of each coil hold material together. Less waste of unuseable material. (More money saved.)

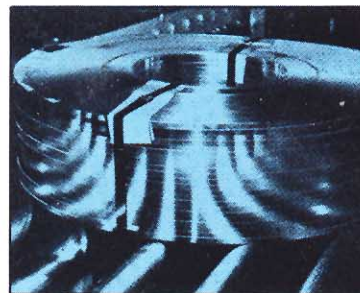

NO WOODEN SPACERS

One coil separated from the Pak to show tightness of an individual coil. You can store more material in a smaller space. (More dollar savings.)

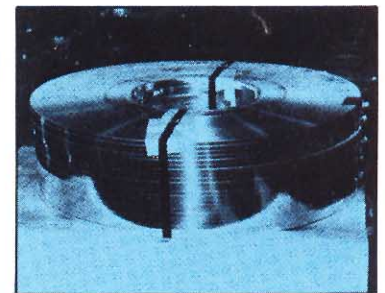

NO BUCKLE DAMAGE

Coils do not collapse or telescope.

LESS HANDLING

Only two bands needed per skid to hold Pak together. Save hours of handling time with less risk of damage to material.

LESS DOWN TIME

Finished Precision Stat Pak™ skid, ready for packaging and shipment. Less down time on your equipment due to faster set-up time. (More money saved.)

PRECISION STEEL WAREHOUSE, INC.
